MUHIB ULLAH

TECHNICAL PROJECT MANAGER

Lahore, Pakistan | +92 328 0025905 | muhib.devv@gmail.com | linkedin.com/in/muhibdevv

PROFESSIONAL SUMMARY

Technical Project Manager with 3 years of experience in client-facing software delivery across e-commerce, feed management and sports products. Previously led a team of six frontend developers. I combine hands-on technical experience with realistic estimation, clear stakeholder communication and close follow-up on risks and blockers, so the work clients value most gets delivered on time. I work directly with clients to turn business requests into clear technical tasks, and keep everyone aligned through sprint tracking and regular updates. My React, Python and Go background helps me judge effort and spot risks early.

CAREER HIGHLIGHTS

- Grew from Frontend Developer to Team Lead to Technical Project Manager in under 2 years, leading six developers.
- Run 4 concurrent projects for 2 clients in e-commerce, feed management and sports, coordinating 12 people.
- Led a large feed management platform for the UK market, on requirements and agreed deadlines.
- Always bring a workable solution to clients, earning praise for quality and going beyond requirements.

CORE SKILLS

Project & Delivery Management: Agile/Scrum, SDLC, sprint planning, requirements clarification, scope and priority management, realistic estimation, risk and blocker tracking, stakeholder reporting, release coordination

Tools: ClickUp, in-house task and sprint tracking software, Git, GitHub, Figma, VS Code, JetBrains IDEs

Technical Background: React, JavaScript, Tailwind CSS, Progressive Web Apps (PWAs), Python, Go, machine learning

Languages: English (professional working proficiency), Urdu (native)

PROFESSIONAL EXPERIENCE

Technical Project Manager

Jul 2025 – Present

Consecutive Bytes | Lahore, Pakistan

- Coordinate 4 projects for 2 clients across e-commerce, feed management and sports, supporting delivery from requirements through release.
- Led delivery of a feature-rich feed management platform for the UK market, aligning implementation with client requirements and agreed deadlines.
- Translate client requests into clear technical tasks, clarify scope and priorities, and propose practical alternatives when a request runs into delivery or technical constraints.
- Set realistic timelines based on technical understanding of the effort involved; plan sprints and track tasks, progress and blockers in ClickUp and an in-house tracking tool.
- Act as the main client contact, giving regular updates on progress, open items, decisions and delivery risks.
- Run team meetings, follow up on action items, maintain project documentation and review deliverables against functional requirements and quality expectations before handover.

Frontend Team Lead Jan 2025 – Jun 2025

Consecutive Bytes | Lahore, Pakistan

- Led six frontend developers building data-intensive dashboards and web applications for clients.
- Allocated work, set priorities and resolved blockers to keep delivery aligned with deadlines and requirements.
- Worked with clients to clarify requirements and turn them into actionable development tasks.
- Conducted code reviews, gave technical guidance and supported developers with complex implementation issues.
- Supported hiring and onboarding, encouraged knowledge sharing and improved team workflows.
- Reported team progress, performance and risks to management.

Frontend Developer Sep 2023 – Dec 2024

ShoppingIQ | UK-based client | Remote

- Developed frontend features for a large feed management platform, plus responsive, data-heavy web applications and Progressive Web Apps.
- Built real-time interfaces focused on performance, usability and reliable data presentation; improved website speed and added fallbacks for failure scenarios.
- Worked directly with the client's team, designers and developers to clarify requirements, share progress, apply feedback and turn specifications into user-friendly interfaces.

EDUCATION

BS Computer Science (BSCS) 2022 – 2026

Riphah International University, Lahore

CGPA: 3.25/4.00

Relevant coursework: Software Engineering, Software Project Management, Database Management Systems, Web Development, Data Structures & Algorithms, System Analysis & Design.

Faculty of Science (F.Sc.) 2020 – 2022

Garrison College, Lahore Cantt

Marks: 971/1100

ACADEMIC PROJECT

DiabPredict: Diabetes Risk Prediction System

Final year project

- Built a machine learning application that estimates diabetes risk from health indicators, patient attributes and medical report data.
- Worked across data collection and preparation, model training and presentation of results for users.
- Applied software development, AI integration and problem-solving skills across the whole project.
